Co-ordinate System and Datum:

Geographic co-ordinates are referenced to Australian Geodetic Datum 1984 (AGD84) in decimal degrees.

Cadastral information is based on 1998 DCBC data (Australian Map Grid (AGD84)) used under license from the State of Queensland (Department of Natural Resources and Mines).

Topographic data is based on 1997 1:250,000 topographic data (Australian Geodetic Datum 1966) used under license from the Commonwealth of Australia (Geoscience Australia).

Use of Co-ordinates:

Where co-ordinates are used within the description to represent cadastral or topographic boundaries or the intersection with such, they are intended as a guide only. As the custodians of cadastral and topographic data continuously re-calculate the geographic position of their data based on improved survey and data maintenance procedures, it is not possible to accurately define such a position other than by detailed ground survey.
