

SCHEDULE 1

Part 2 – Plans of the Agreement Area

(attached)

Land Title Act 1994 ; Land Act 1994
 Form 21 Version 3

This survey has been carried out in accordance with Cadastral Survey requirements Section 3.31 "Remote Area Surveys"

Some boundaries have been measured using GNSS observation techniques and have not been blazed or run

See sheet 2 for diagrams A-C & P,
 sheet 3 for diagrams D-G,
 sheet 4 for diagrams H-J,
 sheet 5 for diagrams K & X,
 sheet 6 for diagram L,
 sheet 7 for diagrams M,N & W,
 traverses & line pegs,
 sheet 8 for reference marks,
 permanent marks &
 corner information,
 sheet 9 for diagrams Q & R,
 & inset,
 sheet 10 for diagrams S-V &
 sheet 11 for closed road (diag O)

Area of new road
 (11-12-150-19-20-152-114-113-151-146-149-
 181-322-10a-10-322a-11) 807 ha

Area of closed road
 (See sheet 11) abt 994 ha

Area of Lot 21 in Carpentaria SC
 2507 ha

Area of Lot 21 in Cook SC
 170 693 ha

This is one of 4 plans
 of the one survey, see
 SP241432, SP252529,
 SP261207 & SP262570

I, Leslie Clyde Fehlhaber hereby certify that the land comprised in this plan was surveyed by me, Ian William Honor, Lyle Van Teinhoven and Jeffrey John Pickford, Cadastral Surveyors, for whose work I accept responsibility and that the plan is accurate, that the said survey was performed in accordance with the Survey and Mapping Infrastructure Act 2003 and Surveyors Act 2003 and associated Regulations and Standards and that the said survey was completed on 12-6-2014

Leslie Fehlhaber 4:7:2014

Survey Report: SP262570, SP261207, SP252529 and SP241432

Survey plans SP262570, SP261207, SP252529 and SP241432 have been prepared for the issue of grants and creation National Parks under the Aboriginal Land Act 1991, and under the Cape York Peninsular Heritage Act 2007, and the creation of Resource Reserves under the Nature Conservation Act 1992. The survey has been completed in accordance with the Cadastral Survey requirements Section 3.31 "Remote Area Surveys".

This survey deals with all of the land contained within the Pastoral Holdings of Strathmay, Crosby, Dixie, Wulpan, Killamey and Mary Valley and facilitates the exchange of lands between Imooya Holding and Killamey and Wulpan Holdings. See SP266613 for the final boundaries of Imooya Holding after the exchanges.

Reinstatement

Alice River Mining Field – Imooya Station Lot 5228 on PH1242

The Alice River Mining Field was gazetted in GG 1906.2.1195 and is describes as:

"Commencing at a point bearing south at a distance of 2 miles from mining Lease No 18 Peninsular King, being a point bearing about 348 degrees and distant 27.75 miles from the confluence of Eliza Creek with the Palmer River, and bounded thence on the south by a line bearing east 5 miles; on the east by a line bearing north 10 miles; on the north by a line bearing west 10 miles; on the west by a line bearing south 10 miles; and again on the south by a line bearing east 5 miles to the point of commencement."

Mining Lease 18, prior to the above gazettal, was surveyed on MP29786 by Surveyor James Cobon showing the connection to Eliza Creek from station 9 on that plan.

Surveyor Stomfal in 1988 surveyed a number of mining leases within the ex-Alice Mining field, and on the survey of ML906 on MP41021 located one of the original survey posts from Surveyor Cobon's survey of ML's 16 and 19 on MP29788. In the course of his surveys Cobon connected the mining leases by survey including ML 18 mentioned in the Gazette. This survey reinstates the position of Stn 9 on MP29786 by assuming Cobon's surveys were on CAM. No other marks from his surveys could be found. The bearing of the Gazettal of the Alice River Mining Field is also taken to be on the cardinals of CAM.

The positioning of the Alice mining field is at odds with the pictorial representation of the location on the mining field on historical maps. It would appear that Cobon has some form of error in his 29 mile connection to the confluence of Eliza Creek and the Palmer River or misidentified the confluence. The positioning of the Mining Field on historical maps was made using Cobon's connection and is in error with the actual location of the surveyed Mining Leases on the ground.

The discrepancy of the mining field as gazetted in relation to the mining lease surveys is some 4 kilometres west of the position shown on the old mapping. It is apparent that the intention of the gazettal was to create the mining field with the mining leases in the centre of the field in relation to the east west boundaries. The mineralisation in the area extends more to the north than the south in relation to the original lease surveys which is consistent with the old Mining Field being gazetted favouring a more northerly extent from the surveyed leases. This is clearly in agreement with the gazetted metes and bounds.

A north south fence line exists in the vicinity of the road to Laura 4 km east of the eastern boundary of the Mining Field. A further north south fence line exists 4.3 km to the east of the western boundary of the mining field. Some fencing exists close to the northern boundary. The main working fence of Imooya on the southern boundary is some 3.2 km south along the Dixie boundary and has a NNW direction to end up 1.0 km south of the southern boundary of the mining field and 4.5 km east of the SW corner. No fencing exists on the north east quadrant the old mining field.

I advised the previous lessee of Killamey Holding (Bill German who has a permit to occupy) and the lessees of Imooya Holding of my findings on the boundary locations. I also informed Les (Caretaker at Dixie) of the location of the boundaries as gazetted. I discussed the discrepancies with Mr Buzz Symonds (the state governments representative for Dixie, Wulpan and Killamey Holdings - which were purchased by the state and adjoin Imooya), the issue with the location of the boundaries and he requested I consult with the lessee of Imooya Holding to find a possible solution to the boundary issues.

On the 18th November 2012 I spoke at length with Allison Woodside, one of the lessees of Imooya, and discussed possible options. Allison expressed some shock and concern at the location of the boundaries. During discussion Allison expressed extreme desire to maintain the fencing to the south joining with the Dixie and Wulpan boundary as the boundary of the property. She stated most of the improvements they had done to the land was in this area with good fencing and internal paddock fencing. Allison stated that here was a handshake agreement with Jim Whelan the previous lessee of Wulpan on the location to build the fence. Allison also expressed that the working fence, in the vicinity of the western 2 thirds of the northern boundary should be maintained as the boundary with Wulpan. There is no fencing in the vicinity of the western boundary, nor in the NE quadrant of the property. Allison expressed acceptance to exchange the north eastern quadrant of the property from the SE corner of the Mining Field to the end of the fence on the Northern boundary. This is the terminus of the common boundary of Dixie and Killamey on the Imooya northern boundary. Further to these discussions agreement was reached with the state and the lessees and the outcome being the land exchange as surveyed with importance being placed on existing fencing, access to permanent water, and a practical position of the new boundaries for future fencing.

Mr Bill German and Allison both stated the habitat of the land in the north eastern quadrant housed many rare golden shouldered parrots and that this area should be protected. Allison further stated that the area in the SW quadrant contained good water supplies and is an asset to the property.

In light of the proposed exchanges and road opening the resultant net area of Imooya is about 70 hectares larger. The original area of the Mining field was 25900 hectares (10sq miles) and the area of roads that existed within being about 460 hectares. (See also SP266613)

Boundary of Lots 7, 20 and 21 on SP241432

The original western boundary of Lot 1 on WR4 (Dixie) and Lot 14 on KG5 (Wulpan) was surveyed by surveyor Embley on C153368 using a circumferenter and a perambulator. The eastern boundary of Goathlands No's 1 and 3 on C153368 was fixed using the Original Ironwood at Stn 223 on C153368 and the original calculated bearing and distance to Station 225 on C153368. The bearing of the boundary was determined by plotting and fitting natural features shown in the field notes of C153368 in the vicinity of these holdings. This resulted in a swing to MGA of 4°40' in this particular area of the old survey. The intersection of the line south from the reinstated position of Stn 225 on C153368 with the existing fence at Stn 27 was adopted as the NW corner of Lot 7.

Stations 15 to 6 were also surveyed on C153568 and the location of these boundaries was determined by plotting features shown in the field notes of Embley, more particularly the presence of a large breakaway south of Stn14 and swamps and creek crossings shown in the field notes. This resulted in a swing of 5°21'20" in this particular area of Embley's survey for the lines Stn's 14 to 6. The positioning using features resulted in a 148 metre excess Stn's 8 -14, and deed or close to deed for Stn's 6-7 and Stn's 7-8.

The western boundary of Lot 47 on CP846855 was created by holding the position of the fencing located between Stn 68 and 69 and joining this to the fencing at Stn 1. Stn 2 is fixed 3000 metres west of Stn 1. Stn 310 is fixed from northern most corner of Lot 434 on SP136214. This corner was positioned by plotting and orientating Embley's (C153340) river traverse on SPOTMaps 2004-2010 Imagery and positioning Stn180/C153340 by deed bearing and distances on C153340 and SN7. A search for the ORT at the station 180/C153340 did not realise the original tree. (see Inset Sheet 9 SP241432).

Stn 312 coincides with Stn 234 on C153367. The ORT at the station could not be found. The location was determined by plotting Embley's features in his field notes. Embley's survey ran in an east west direction and did not connect to his surveyed boundaries further to the north. The position of the original tree as plotted falls some 200 metres to the SW of Stn 312, however in consideration of the inaccuracies in the surveys and in the plotting and interpretation of his information the fence line in the vicinity was adopted as being on the boundary. There is no fencing between Stns 311 and 310. The through distance Stn's 312 to 310 is within 130 metres of the original about distance of 63200 shown on KG5.

State copyright reserved.

Insert Plan Number	SP241432
--------------------------	----------

Lot's 6 and 16 on SP262570 and Lot 4579 on SP252592

The northern boundary of 6 on SP262570, Lot 7 on SP241432, and Lot 4579 on SP252592 is a straight line and is fixed by a line from Stn 27 (as fixed above), in consideration of the fencing and gate over the road near Stn 31 (SP262570) and the fence post west of Stn 7 (SP252592) on the Peninsula Developmental Road. The fixation of this boundary was discussed with Mr Tom Sheppard, the adjoining lessee of Arimus, and he was in agreement with the location as surveyed on these survey plans.

The common boundary between Lot 6 and Lot 4579 generally accords with the about boundary defined on PH1783 and PH633. This boundary is not fenced near the boundary and it's location is not an issue in this dealing given the state currently owns both parcels.

Stn 37 on SP262570 is fixed using the original marks at Stn's 36 and 38 and the dimensions shown on SP215745.

The intersection of the existing surveyed boundary Stn 40 to 42 and the north south fence at Stn 41 was use to fix Stn 41. This fence line at Stn 41 is located 170 metres short of the original about distance to the Hann River as shown on Wr 2. The common boundary between Lot 1 on WR2 and Lot 16 on SP252570 is fixed by holding the distance of 1600 metres at the SW corner of Lot 1 on WR2 to a prominent bend in the Hann River.

PH1849 shows the NE corner of Kimba (Lot 47 on CP846855) as being 2500 metres north of the SW corner Lot 1 on WR2. Stn 43 was created by holding deed angle at Stn 43 and connecting to Stn 70 on SP241432, the original SE corner of Imcoya Holding (ex Alice River Mining Field). This resulted in 150 metres excess to SW corner of Lot 1 on WR2. This boundary is consistent with fencing located near Stn 44. Examination of imagery shows that the fencing southwards from Stn 41 diverges eastwards from the boundary to be approximately 210 metres east of the boundary at the 10km mark before the fence become quite irregular crossing the boundary 11 km south of Stn 41. The rest of the fencing lies west of the boundary Stn 41 to 43. A straight section of existing fencing about 5km long lies about 420 metres west of the boundary line adjacent to the southern part of the boundary Stns 41 to 43.

Examination of PH1849 (Kimba Holding) and PH2069 (King Junction Holding) shows the combined north south length of the eastern boundary as being about 39684 metres north a of point 110 degrees 1.75 miles from the NE corner of the old Strathlevan Holding (shown on Embley's plan C153340). Embley's river traverse was plotted and positioned against 2.5 m pixel SPOTmaps 2004 -2010 Imagery to create the position of this corner (783276 East 8242713 North Zone 54 MGA94). The north south distance calculated from the plotted position and Stn 43 to this point is 39620 therefore supporting the position of Stn 43 given the uncertainty in the dimensions.

It is noted that the eastern boundary of Wilpella Holding on PH2050 shows the distance from Kalinga Holding to Kimba Holding as being 11.5 miles (18507 metres) and the dimension of Stns 41 to 43 on SP262570 as being 19428. This difference is partially attributable to the historically poorly plotted position of the Alice River Mining Field and to the adoption of fencing on the Kalinga Survey on SP215745. I also note that the distance along the western boundary of Lot 1 on Wr2 is consistent with the distance on this survey i.e. within 25 metres.

Lot 10 SP261207

Stn 190 on SP261207 was marked by Surveyor Embley in 1886 (Stn 224 on C153368). The station was surveyed as part of a west to east line Embley ran terminating under 2 miles east of this point. No evidence of Embley's trees were found to fix this corner, however the north south fence line was within the accuracies of plotting the features shown in this survey and adopted as the western boundary at Stn 190. The bearing of the line from Stn 15 was maintained in the same meridian difference of 4° 40' determined by plotting features in Embley's field notes from the ORT at Stn 34 on SP241432 through to Stn 15. A straight line was maintained Stn 15 to 190 as intended in Embley Survey on C153368. Embley did not run north from Stn 190. The tree at the intersection of fences at Stn 192 was adopted. The fence from Stn's 190 to 192 is straight and fits well along the line. The bearing of the fence is consistent with the bearing on PH1137.

Stn 193 is fixed at a distance of 13.2 miles from Stn 196 maintaining the line from Stn 196, through Stn 192 as shown on PH868. This creates excess of approximately 500 metres between Stn's 192 and 193 (see PH2209) as a result of adoption of the fence at Stn's 190 to 192. The difference is in favour of the adjoining owner of Lot 473 on SP206203. The position of Stn 196 is within 100 metres of the plotted location from natural features shown in Embley's field notes for C153368. The original reference tree's at Stn 196 and others in the vicinity could not be located. In the absence of the trees the intersection of fences was adopted as the corner given it's close proximity.

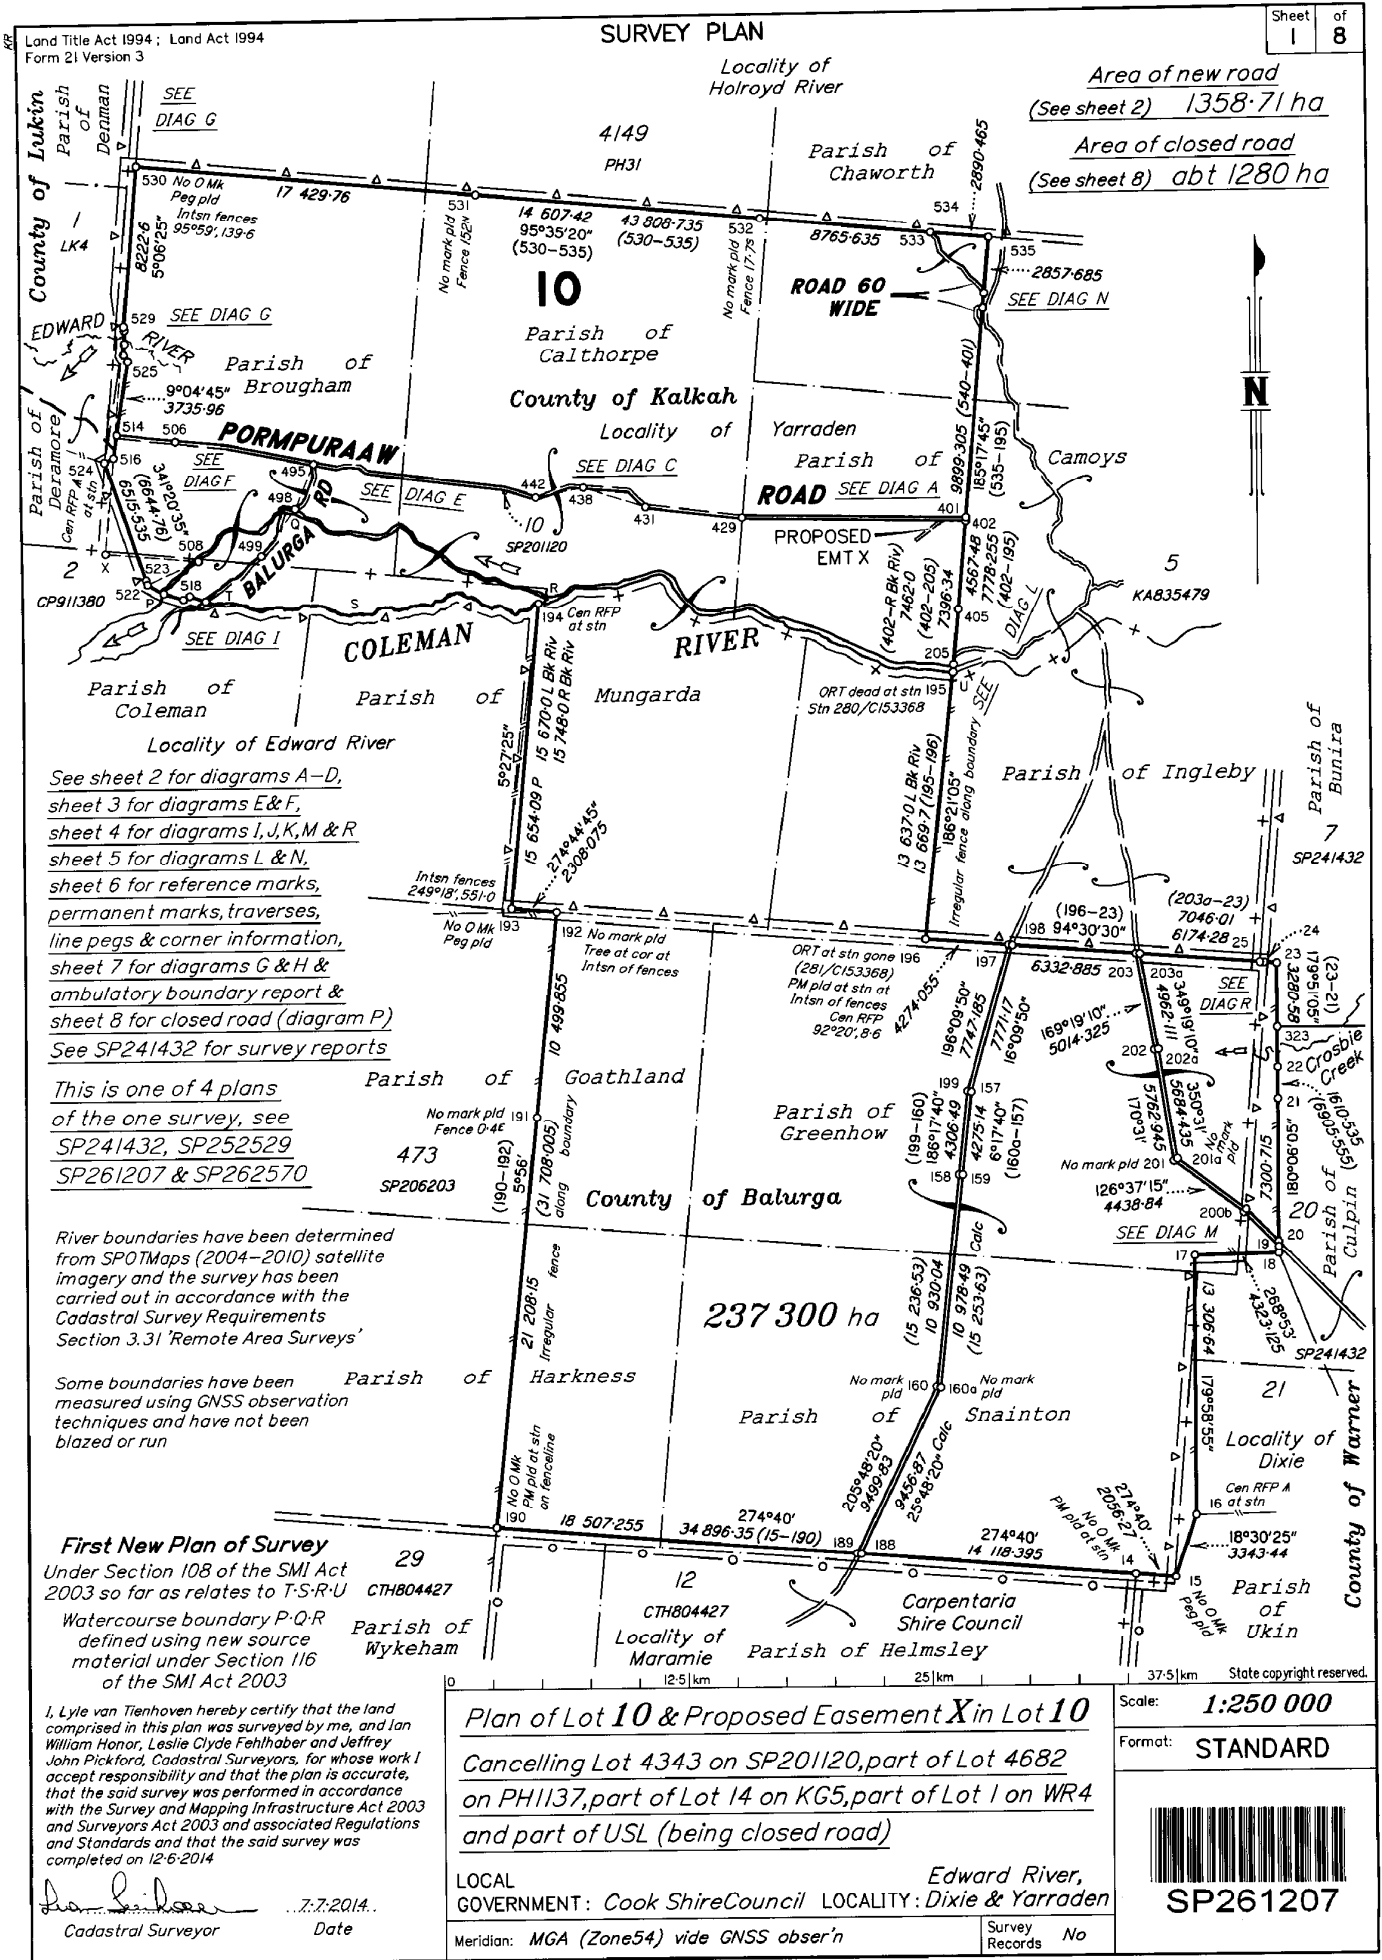

PH868 shows the location of Stn 194 as being near the Coleman River about 1.5 km from Original Tree Broad Arrow over "N" (C153368). This Original Tree could not be found at the position reinstated from the ORT found at Station 508. The distance from the RFP at Stn 194 to the reinstated position of the ORT measured 1750 metres. Given it is over 16km to the ORT at Stn 508 the RFP was adopted as the corner as this is well within the expected accuracy of the original survey on C153368.

The fences and cleared fence lines from station 500 to Stn 529 were adopted as being on the boundary as indicated on SP201120.

The original SW corner (Stn X) of Minka Holding (PH868) was originally defined as being 12.9 miles from Original Tree Broad Arrow over N (west of Stn 196 on C153368). The original distance from the ORT at stn 508 to the Original Tree Broad Arrow over N was 79500 links. The original SW corner was therefore deduced as being 23700 links west of the ORT found at Stn 508. The original western boundary was defined from this point to Stn 115 on C153372. The position of Stn 115 on C153372 was determined by plotting the original river traverse and fitting the traverse to imagery and topographic mapping. The coordinates derived from this plotting was used to define the original boundary line (Stn X to Stn Y) and its intersection with the fence line at Stn 529 and the westward production of the fence line east of Stn 530 (see Sheet 1 SP261207). The fencing is adopted as the boundary of Lot 10 from Stn 517 at Baluga Road through Stn 522 to Stn 529 as per SP201120 where the intention was to adopt the fence as the boundary.

Irregular fencing exists along the northern boundary of Lot 10. The fencing is well sign posted as demarcation of the boundary of Strathmay Holding to Strathburn Holding at the crossing of the northern fence on the formed road between Stn 533 and Stn 534. The fence at this location was used to define the boundary line between 530 and 525 and is within 5' of the about 90° CAM bearing shown on PH31. The offset from this boundary to the existing fencing is 18 metres north at Stn 535, and 18 metres south at Stn 532. The fence further to the west of Stn 532 is less consistent with the boundary defined on PH31.

The north eastern boundary of Lot 10 was defined by holding the ORT at Stn 195 then by a line adopting the fencing from Stn 540 to Stn 535. The eastern fence become less consistent between Stn's 401 and 205. The lessee of Strathhaven (Lot 5 on KA835479) seemed not interested in adopting the existing fencing as the boundary between Stns 401 and 195 when approached on this matter. The boundary from Stn 195 to 196 generally follows the fencing which is quite straight in this section with Stn 196 fixed as mentioned above.

AMBULATORY BOUNDARY REPORT

Survey of non-tidal watercourse boundary

The natural feature being the top of the high bank of the Coleman River was adopted as the location at law in accordance with Sec 108 of the Survey and Mapping Infrastructure Act 2003 (SMIA). This natural feature boundary accords with the non-tidal boundary location criteria in Sec100 of the SMIA of the follows:

- 1. The top of the bank appears to be in a natural state and in a reasonably stable location.
- 2. It is not a line of intersection of a particular level of water with the land and is not transient in nature.
- 3. It is the top of the high bank of the Coleman River.

The current location of this natural feature has been determined by a combination of field survey and by interpretation using SPOTMaps (2004-2010) satellite imagery. The location from imagery agreed well with the field measured position of the high bank of the river at or near stns 195, 194, 500a, 520 and 521. Therefore the digital representation from imagery was adopted as the location of the Coleman River. Between stns 194 and 500a the adopted southern boundary of the subject land was the northern high bank of the southern branch of the Coleman River.

Survey of non-tidal watercourse boundary (New source material)

About 500 metres east of stn 194, an anabranch of the Coleman River splits from the main channel. The main flow of the water in the Coleman River took the northern branch. This branch has been excluded from the subject land. The survey of this section of the Coleman River used new source material as this section had never been surveyed. New source material provided under Section 116 of the SMI Act 2003.
