

SCHEDULE 1 - EXTERNAL BOUNDARY OF THE AGREEMENT AREA

The Agreement Area comprises all land and waters bounded by the following line and as depicted in the maps contained in Schedule 2.

Commencing at a point being the intersection of the borders between Queensland, South Australia and Northern Territory; then easterly along the northern border of South Australia (being the southern border of Queensland) to its intersection with Longitude 140.001231 East; then in straight lines connecting the following coordinate points:

Longitude (East)	Latitude (South)
139.900728	26.147648
139.800759	26.315911
139.569764	26.693364
139.367244	26.953967
138.719232	27.787831
138.102550	27.864510

the latter point being a point on the centreline of Warburton River; generally north-westerly and south-westerly along the said centreline of Warburton River, generally being straight lines connecting the following coordinate points:

the later coordinate being the intersection of the said Macumba River with the southern production of the western boundary of Simpson Desert Regional Reserve – Block 565, OH (Dalhousie); northerly along the said production and the western boundary of Simpson Desert Regional Reserve – Blocks 565, 564 & 563 to the northern border of South Australia (being the southern border of Northern Territory); then easterly along the said northern border of South Australia to the point of commencement.

Reference datum

Geographical coordinates have been provided by the Department of Planning, Transport & Infrastructure, Land Services Group.

Geographical coordinates are referenced to the Geocentric Datum of Australia 1994 (GDA94), in decimal degrees.

Data reference and source

Watercourses and waterbodies referenced to GEODATA TOPO 250K – Series 3 © Commonwealth of Australia (Geoscience Australia).

Cadastral data sourced from Department of Planning, Transport & Infrastructure SA (3 February 2014).

Use of Coordinates

Where coordinates are used within the description to represent cadastral or topographical boundaries or the intersection with such, they are intended as a guide only. As an outcome of the custodians of cadastral and topographical data continuously recalculating the geographic position of their data based on improved survey and data maintenance procedures, it is not possible to accurately define such a position other than by detailed ground survey.
