Notes:

Reference Datum

Geographical coordinates are in decimal degrees and are referenced to the Geocentric Datum of Australia 1994 (GDA94).

Use of coordinates

Where coordinates are used within the description to represent cadastral or topographical boundaries of the intersection with such, they are intended as a guide only. This is an outcome of the custodians of cadastral and topographic data continuously recalculating the geographic position of their data based on improved survey and data maintenance procedures. It is not possible to accurately define such a position other than by detailed ground survey.
