

ANNEXURE 2: Ellendale ILUA

External boundary description

The agreement area covers all the land and waters within the external boundary described as:

Commencing at the intersection of the western boundary of Exploration License E04/1006 and the southern boundary of Native Title Determination Application WAD258/2012 Warrwa #2 (WC2012/009) and extending easterly and generally north easterly along the southern boundary of that native title determination application through the following coordinate points:

Longitude° East	Latitude° South
124.712128	17.487555
124.805150	17.454219
124.806737	17.432313

Then north easterly along a line to Longitude 124.851184° East, Latitude 17.388183° South until that line intersects the southern bank of the Lennard River; then generally easterly along the southern bank of that river to its intersection with the eastern boundary of Exploration Licence E04/1093; then generally south easterly along the eastern and northern boundaries of that exploration licence, northern, eastern and southern boundaries of Exploration Licence E04/819 and eastern boundaries of Exploration Licence E04/1062; then generally north westerly along the southern boundaries of that exploration licence and Exploration Licence E04/801 to the northern boundary of Exploration Licence E04/1098; then easterly, southerly, generally south westerly, westerly, generally north easterly and generally north westerly along the northern, eastern, southern and western boundaries of that exploration licence and Exploration Licence E04/726 to an eastern boundary of Exploration Licence E04/1075; then southerly and westerly along the eastern and southern boundaries of that exploration licence to the prolongation northerly of the eastern boundary of Exploration Licence E04/1231; then southerly along that prolongation to the north eastern corner of Exploration Licence E04/1231; then southerly along the eastern boundary of that exploration licence to the northern boundary of Exploration Licence E04/1186; then easterly, southerly and generally south westerly along the northern, eastern and southern boundaries of that exploration licence to the prolongation easterly of the southern boundary of Exploration Licence E04/1254; then westerly along that prolongation to the south eastern most corner of Exploration Licence E04/1254; then westerly, generally north westerly and generally south easterly along the southern, western and northern boundaries of that exploration licence to a north eastern corner at Longitude 124.633319° East, Latitude 17.649971° South; then along the prolongation easterly of the northern boundary of that exploration licence to the western boundary of again Exploration Licence E04/1186; then generally northerly along the western boundary of that exploration licence, southern, western and northern boundaries of Exploration Licence E04/1212, western and northern boundaries of Prospecting Licence P04/204 to the westernmost boundary of Exploration Licence E04/1006; then northerly along the western boundary of that exploration licence back to the commencement point.

For the avoidance of doubt the agreement also excludes all land and waters subject to the following Native Title Determination Application:

- WAD258/2012 Warrwa #2 (WC2012/009) as accepted for registration on 9th November 2012.

Note

Data Reference and source

- Agreement boundary data compiled by National Native Title Tribunal based on data sourced from Landgate (WA).
- Native title determination application WAD258/12 Warrwa #2 (WC2012/009) as accepted for registration on 09 November 2012.
- Tenement data sourced from Department of Mines and Petroleum (WA) as at March 2004.
- Rivers/Creeks based on topographic vector data © Commonwealth of Australia (Geoscience Australia) 2003.

Reference datum

Geographical coordinates have been provided by the NNTT Geospatial Services and are referenced to the Geocentric Datum of Australia 1994 (GDA94), in decimal degrees and are based on the spatial reference data acquired from the various custodians at the time.

Use of Coordinates

Where coordinates are used within the description to represent cadastral or topographical boundaries or the intersection with such, they are intended as a guide only. As an outcome to the custodians of cadastral and topographic data continuously recalculating the geographic position of their data based on improved survey and data maintenance procedures, it is not possible to accurately define such a position other than by detailed ground survey.

Prepared by Geospatial Services, National Native Title Tribunal (22 July 2013).
